

Osama Riyad

Software Engineer

0797836521 — osama.riyad03@gmail.com — Portfolio — GitHub — LinkedIn — Amman, Jordan

Summary

Full-stack engineer specializing in production-grade AI systems, scalable microservices, and enterprise solutions where data integrity and maintainability are architectural decisions, not afterthoughts.

Experience

- **Odoo Development Intern** May 2026 – Aug 2026
Leading Point Software
• Built and customized Odoo modules for client business workflows.
• Integrated third-party services and shipped fixes into production deployments.
• **Skills:** Python, Odoo, PostgreSQL, XML
- **Software Engineer** Sep 2024 – Dec 2024
Cellula Technologies *Remote*
• Contributed to an AI-enabled software mobile application product using Clean Architecture and structured state management.
• Integrated APIs and scalable features to improve system reliability and maintainability.

Featured Projects

- **Shughaily — Full-Stack AI Job Copilot (Bilingual SaaS Platform)**
Tech Stack: React 19, Express, Flask, PostgreSQL/pgvector, Redis, TypeScript, Docker
• Engineered semantic job matching system using pgvector embeddings and skill-overlap scoring algorithms.
• Developed CV parsing (PDF/DOCX) with combined LLM and regex pipelines plus automated ATS analysis.
• Built bilingual Arabic/English RTL/LTR interfaces with live language switching and auto-tailored cover letters.
- **Souq Connect — Odoo Addon for MENA Retail**
Tech Stack: Odoo 18, Python, PostgreSQL, Docker, QWeb
• Implemented cash-on-delivery (COD) accounting with real double-entry ledger entries and clearing accounts.
• Designed branch-scoped COD workflows, driver cash custody tracking, and multi-branch stock transfers.
• Integrated ZATCA-style e-invoicing with TLV/QR code encoding and bilingual reports.
- **CodeBuster — AI-Driven PR Review Platform**
Tech Stack: Flask, Celery, Redis, React
• Built automated first-pass PR review system performing correctness, style, and security static analysis.
• Implemented asynchronous job queues via Celery and Redis to prevent blocking and handle heavy loads.
- **MedJust — Medical Study Companion App**
Tech Stack: Flutter, Dart, flutter_bloc, Firebase
• Created cross-platform app for medical students featuring integrated study utilities, Pomodoro timer, and task manager.
• Enabled timestamped notes synced directly to video lectures, document viewers, and medical news feeds.

Education

- **Computer Engineering — Bachelor's Degree** 2021 – 2026
Jordan University of Science & Technology (JUST) *Irbid, Jordan*

Skills

Languages: Python, JavaScript, TypeScript, SQL, Dart, XML
Frameworks & Tools: React, Flutter, Node.js, Flask, Django, FastAPI, Odoo, Celery, Firebase, React Native
Infrastructure & Databases: GCP, Docker, PostgreSQL, Redis
Version Control: Git & GitHub
